### **DETAILED ACTION**

1. The amendment filed 6/10/2005 has been placed of record in the file.
2. Claims 1, 4-9, 12, 14, 17-22, 27, 29, 30, 33, 35, and 36 have been amended.
3. Claims 39-48 have been canceled.
4. The objection to claim 12 is withdrawn in view of the amendment.
5. The rejection of claims 1-38 under 35 U.S.C. 112 is withdrawn in view of the amendment.
6. Claims 1-38 are now pending.
7. The applicant's arguments with respect to claims 1-38 have been fully considered but they are not persuasive. A detailed discussion is set forth below.

### ***Information Disclosure Statement***

8. The IDS filed 6/10/2005 has been considered.

### ***Response to Amendment***

9. Claims have been amended to overcome a claim objection and claim rejections under 35 U.S.C. 112. The amendments do not prove a change in scope to the limitations of claims 1-38.

### ***Claim Rejections - 35 USC § 103***

10. Claims 1-38 remain rejected under 35 U.S.C. 103(a) as being unpatentable over Oh et al. (U.S. Patent Number 6,519,458), hereinafter referred to as Oh, in view of Godlewski (U.S. Patent Number 6,421,354) as stated in the previous action mailed 3/7/2005.

*Response to Arguments*

11. In the remarks, the applicant has argued:

- <Argument 1>

The combination of Oh and Godlewski does not disclose the features of claim 1 because it does not disclose “issuing an acknowledgment message from said Internet server to said remote terminal unit via said communication module” as recited in claim 1.

12. In response to argument 1, the combination of Oh and Godlewski does disclose issuing an acknowledgment as recited in claim 1. The applicant is again directed to the paragraph beginning at column 7, line 46 of Godlewski where Godlewski clearly states a command handler to send messages (including acknowledgments) to the communicators of the system. The applicant has argued that “Godlewski discloses sending acknowledgment messages to the communicators and not to the remote terminal unit via the communication module as claimed.” However, Godlewski’s communicators are client devices and are analogous to the mobile terminals of Oh’s system. Further, it has already been seen that Oh discloses communications between a server and a mobile terminal via a communication module. Thus, the combination of Oh and Godlewski satisfies the limitation of “issuing an acknowledgment message from said Internet server to said remote terminal unit via said communication module” as recited in claim 1. It is noted that the above mentioned paragraph of Godlewski also refers to the communicators of the system receiving instruction messages which relates to the applicant’s remarks regarding similar claim 27.

Art Unit: 2152

13. In addition, the applicant has argued that claims rejected under 35 U.S.C. 103, but not explicitly discussed, are allowable based on the above arguments. Thus, claims disclosing similar limitations to the discussed claims and related dependent claims remain rejected under the same reasoning as presented above.

### ***Conclusion***

14. **THIS ACTION IS MADE FINAL.** The applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
